WHO periodically updates the [Global surveillance of human infection with coronavirus \(COVID-19\) document](#) which includes surveillance definition.

**F**  
 COVID-19 is a disease for surveillance purpose. It is derived from clinically compatible illness in probable or confirmed COVID-19 case, unless there is clear evidence of a case of the disease not related to COVID-19 (e.g., other virus). There should be no period of complete recovery between the illness and the case.

Cautions must be taken when interpreting the difference between the two types of information produced by the public information authorities, namely the source of information and the inclusion criteria. In order to ensure accuracy and reliability, the public information authorities must ensure that the information is reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted.

The information provided by the public information authorities must be reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted.

[1] All references to the public information authorities must be in the context of the public information authorities. In the public information authorities, the public information authorities must ensure that the information is reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted.

Counselling and advisory services must be provided by the public information authorities. The public information authorities must ensure that the information is reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted.

Other: include the public information authorities. The public information authorities must ensure that the information is reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted.

Due to the recent changes in the public information authorities, the public information authorities must ensure that the information is reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted.

The public information authorities must ensure that the information is reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted. The difference between the two types of information is that the public information authorities must ensure that the information is reliable, and that the information is not distorted.

- No case: with no confirmed case (shown in table).
- Positive case: with one or more cases, imported or locally acquired.
- Cluster of cases: experiencing cases, cluster in time, geographical location and/or by common exposure.
- Community transmission: experiencing a large outbreak of local transmission through the community, but no limit on the number of cases or linkable to a transmission chain; the number of cases from an individual surveillance; and/or multiple unrelated clusters in ever increasing numbers of the country/territory.
- Pending: transmission of cases has not been reported to the HO.

ii "erroneous" include erroneous, relevant, open-ended, and other information of similar nature.
